## What is BERA?

The British Educational Research Association is a member-led organisation dedicated to supporting educational researchers and promoting educational research.

Since its inception in 1974, BERA has expanded into an internationally renowned organisation with UK and non-UK based members. It strives to be inclusive of the diversity of educational research and scholarship.

A strong membership of over 2,500 members secures BERA's place as the home of educational researchers in the UK, providing access to distinguished journals, a world class conference and other events, and an active peer community.

**BERA's aim is to encourage the pursuit of educational research and its application for both the improvement of educational practice and for the public benefit.**

## Benefits of BERA membership

- Discounted registration at our annual international conference and other events throughout the year.
- Membership of any of our special interest groups (SIGs).
- Free online access to the highly regarded BERA Ethical Guidelines and Charter for Research Staff.
- On-line access to the associated titles Review of Education (RoE), British Educational Research Journal (BERJ) and the Curriculum Journal.
- On-line access to our innovative *Insights* publications.
- Print and online copies of our termly membership magazine: Research Intelligence.
- Opportunities to publish a post on the BERA Blog.
- Web-based and email bulletins on research news and events.
- Opportunities to apply for one of many of our highly successful award competitions.
- Opportunities to apply for any of our bursary competitions.
- Opportunities to submit abstracts for our international exchange symposia schemes with AERA, AARE, NZARE, EAARLI, amongst others.
- Opportunities to stand for election as a trustee of the Association and ensure participation at the highest levels of decision making.
- A central London venue headquarters office led by eight professional staff with responsibilities for membership and engagement, the annual conference and events, secretariat, publications and awards.
- Opportunity to be part of a vibrant, forward-looking community of educational researchers and to contribute to continuous development of the field of educational research.

For further information on how to join BERA, please call or email us at: T: +44 (0) 20 4570 4265, E: [membership@bera.ac.uk](mailto:membership@bera.ac.uk), British Educational Research Association, Elizabeth Meehan Suite, Regent House, 1–6 Pratt Mews, London, NW1 0AD [www.bera.ac.uk](http://www.bera.ac.uk)

# Guidelines for contributors

Authors submitting articles to *BJET* are encouraged to read our detailed notes for authors, available from our website at [www.thebjet.com](http://www.thebjet.com). Submissions are made online using ScholarOne Manuscripts. Book reviews are commissioned. We reserve the right to edit all submissions and to decide when accepted articles are published.

We welcome jargon-free writing: write as clearly as you can. Remember that our readers are busy people: conciseness is a virtue, whatever the overall length. Avoid parochial references and assumptions: for many *BJET* readers English is not their mother tongue. Age groups of students should be clarified rather than referring only to "Grade 5, Year 6, etc." Spell out all acronyms first time around.

Importantly, reports of experimental work should be analytical, not merely descriptive: reviews of developing fields should be critical, not merely informative; theoretical overviews should contain some original contribution or novel perspective.

Some authors wish to link their contribution to a Web site containing interactive multimedia material, or to refer to large data sets which cannot be accommodated in the printed journal. We have models for publishing such contributions and the Editor will be pleased to discuss this with you.

All contributions must be original. Do not submit material that has been published in any languages previously or is being considered for publication elsewhere. Otherwise, it is not eligible for *BJET*. As a matter of routine, *BJET* checks all of the work submitted for publication using iThenticate. This provides us with a report on material within your submission that has previously been published elsewhere—by yourself or by others. Submissions with an unacceptable level of overlap with previously published work, will not be considered for publication. Wiley, like most major publishers, has arrangements in place with the UK CLA and similar bodies overseas and can relieve authors of the need to protect their copyright and deal with permissions.

## Articles

We are looking for articles that "take us beyond what we already know." A description of an established methodology in a familiar environment needs to have some novel aspect or be spectacularly written, if it is to gain the approval of the reviewers.

Articles should not normally exceed 6000 words *excluding* references to any sources that readers might wish to trace. However, there is no merit in lengthy reference lists *per se*. Wherever possible, the reasons for citing a reference should be clear from the context. Please check very carefully both their accuracy and presentation.

*BJET* is heavily oversubscribed (our acceptance rate is currently below 10%) and we regret that over-length articles cannot be accommodated. Occasionally it is not possible to make the argument fully within 6000 words, for example where detailed qualitative data or in-depth reviews are presented, so we allow some leeway - but we do need to be convinced that the additional material is really necessary. An exception to the word limit may be made where a review article cites a large number of relevant references. Note that the option to submit supplementary online material is open to all authors and this can be a very valuable way to make available to interested readers further data, detailed research instruments, technical information, video exemplars, details of articles included in systematic reviews, etc. Information necessary to understand the research methods and findings should be included in the main text, however. For examples of a *BJET* article using this facility, see <http://onlinelibrary.wiley.com/doi/10.1111/bjet.12360/supinfo>

## Submissions

Submissions to *BJET* are now made on-line using ScholarOne Manuscripts. To make a submission, go to <http://mc.manuscriptcentral.com/bjet>. If this is the first time you have used the system you will be asked to register by clicking on 'create an account'. Full instructions on making your submission are provided. You should receive an acknowledgement within a few minutes. Thereafter, you will be kept in touch with the progress of your submission through refereeing, any revisions that are required, and—hopefully—to final acceptance.

Author Services enables authors to track their article—once it has been accepted—through the production process to publication online and in print. Authors can check the status of their articles online and choose to receive automated e-mails at key stages of production. The author will receive an e-mail with a unique link that enables them to register and have their article automatically added to the system. Please ensure that a complete e-mail address is provided when submitting the manuscript. Visit <http://authorservices.wiley.com/bauthor/> for more details on online production tracking and for a wealth of resources including FAQs and tips on article preparation, submission and more.

*BJET* participates in Wiley's Early View service. Early View articles are complete full-text articles published online in advance of their publication in a scheduled issue. Early View articles are complete and final. They have been fully reviewed, revised and edited for publication, and the authors' final corrections have been incorporated. Because they are in final form, no changes can be made after online publication. The nature of Early View articles means that they do not yet have volume, issue or page numbers, so Early View articles cannot be cited in the traditional way. They are therefore given a Digital Object Identifier (DOI), which allows the article to be cited and tracked before it is allocated to an issue. After print publication, the DOI remains valid and can continue to be used to cite and access the article.

MAYeY's OnlineOpen is available to authors of primary research articles whose funding agency requires grantees to make the results of their research publicly available at no cost to readers. With OnlineOpen the author, the author's funding agency, or the author's institution pays a fee to ensure that the article is made freely available immediately upon publication via Wiley Online Library. Note that OnlineOpen does not have any impact on the speed of publication.

## Publisher's note

The *British Journal of Educational Technology* is published by John Wiley & Sons Ltd on behalf of the British Educational Research Association (BERA). BERA's aim is to sustain and promote a vital research culture in education by:

- encouraging an active community of educational researchers;
- promoting co-operation and discussion with policy makers, institutional managers and funding agencies; with other national and international educational research associations; with other researchers in the social sciences and related areas of work and with teachers and lecturers and their associations;
- supporting and enabling debate about the quality, purpose, content and methodologies of educational research;
- developing and defending an independent research culture committed to open inquiry and the improvement of education;
- enhancing the professional service it provides for its members through effective communication and discussion within BERA and the training and education of educational researchers, their effectiveness, conditions of work and rights.

Further information can be found at: [www.bera.ac.uk](http://www.bera.ac.uk)

Although owned by BERA, BJET is editorially independent and the contributions published in BJET do not represent the policy of BERA nor of the authors' institutions. Unless otherwise stated, opinions are those of the authors as individuals.
